- Teamwork

Profile

Full-stack developer specializing in the React and Next.js ecosystem, with a strong interest in modern web application architecture, user experience, and code quality. I enjoy building maintainable, high-performance, and scalable products.

Projects & Experience

- **Development of a CRM for association management**, featuring secure authentication, organization management, contacts, and business modules.
  Technologies: Next.js, TypeScript, Fastify, Better Auth, Drizzle ORM, PostgreSQL, Docker, shadcn/ui.
- **Development of an interactive storytelling platform**, awarded during a 2024 hackathon.
  Technologies: Next.js, React, TypeScript, Supabase, Prisma, PostgreSQL, Tailwind CSS, OpenAI, Stripe
- **Development of an AI-powered content generation platform** based on OpenAI, winner of the Supabase Hackathon 2023.
  Technologies: Next.js, React, TypeScript, OpenAI, Tailwind CSS, Prisma, PostgreSQL, shadcn/ui, Stripe
- **Design and development of an open-source blogging platform** built with Next.js and featuring a content management API.
  Technologies: Next.js, TypeScript, Tailwind CSS, Vercel, Prisma, PostgreSQL, Supabase, shadcn/ui, Redis

Certifications

- **Next.js App Router Fundamentals** apr 2025
  Mastered the core concepts of the Next.js App Router, including layouts, nested routing, and server/client rendering.
- **React Foundations for Next.js** apr 2025
  Covered the essential React concepts applied to Next.js, including components, hooks, and application structure.

Education

- **Professional Bachelor's Degree in Computer Science** sept 2025 → july 2026
  University of Haute-Alsace, Mulhouse
  - Web, software, and mobile application development using object-oriented programming.
  - Database design and management.
  - Project management methodologies.
  - Hands-on projects, requirements specification, and a professional internship.
